CLOSE CONTACT *Boots*

THE FIRST BOOTS IN THE WORLD WITH CLOSE CONTACT TECHNOLOGY

Thanks to our technology and design 100% made in Italy, the boots of our Close Contact series are the first to use CloseTEX (Close ContactTextile), which guarantees maximum contact with the horse thus increasing rider's performance. The CloseTEX boot insert on the inside of the leg limits the wear due to abrasion and offers a higher grip, while it provides softness and durability. The volumes and proportions of the vamp and leg have been adapted to increase comfort and optimize the fit.

CLOSETEX

AIR BOOST VENTILATION SYSTEM

Made of high quality natural calfskin, they're the first riding boots on the market with an exclusive Air Boost ventilation system. With a rear zip, they have a rubber sole that makes them exceptionally comfortable, light and flexible for an all-day wear. The heel has an extremely efficient shock-absorbing system that reduces the impact on the heel and overexertion of the foot.

1932999 CHANGEABLE GULLET

Size: XS - S - M - L - XL - XXL

(10)

X-CHANGE SYSTEM

Pessoa Saddles come with the gullet plate X-Change System. The rider can modify the width of the tree using any of Pessoa's adjustable gullet plates with only a screwdriver. It is really that simple. This system does not change the integrity or look of the saddle. The strength is the same and the feel is the same. The tree can adapt itself to the withers and back of any horse and the tree size can be changed from XS up to XXL Wide.

AMS SYSTEM

Wool and synthetic flocking bunches up in conventional panels, causing hot spots or producing uneven pressure. The AMS System with its special wool flocking guarantees comfort and a very close contacting layer to support the rider's weight and the back of the horse. This layer will also absorb impacts and distribute pressure for maximum comfort and freedom of movement for your horse.
